

Our inspection was conducted on February 28th

Both dams passed inspection and our permits have been renewed.

Copies of the reports have been added to our website

Ryan Stack, P.E. the Chief Engineer of the DNR Dam and Reservoir Safety Program, suggested we install a French Drain at the base of Crystal Lake near the road to help with an area of very wet soil. The drain has been installed.

Dam Vegetative Management – Pollinator Plots

Crystal Lake – After the prescribed burn was conducted, the blackberries were cut and any sprouting plants will be treated with herbicide during the 2023 growing season.

Gem Lake – Additional natives will be planted and grasses will be cut periodically.

Preservation and Enhancement

Many neighborhood beautification activities are conducted and funded through this committee's budget. Please let Judy know if you have ideas or areas of concern.

LAKEWOOD HILLS GAZETTE

Please Volunteer!!

Our Neighborhood Needs YOU!

Reach out to any of the board members or committee chairs you hear speaking today!

We all **NEED YOUR HELP!**

And if you can't help, please be sure to say thank you once in awhile.

These are not paying jobs and it really makes a difference to know that someone appreciates the work being done.

On that note – **Happy National Volunteer Week** and **THANK YOU** to all our current, past and future board members and volunteers!
